

Celherson A. Guzman

Work Experience

Freelance Full Stack Developer January 05, 2023 - Present

- End-to-End System Development: Architect and deployed over 17 custom web applications using Laravel (PHP) and MySQL, transforming complex client requirements into functional, high-performance systems with a focus on scalable database design using SQLYog.
- Modern Frontend & UI/UX: Developed highly responsive, mobile-first user interfaces by leveraging Tailwind CSS and JavaScript, ensuring a seamless user experience across multiple devices while maintaining clean, maintainable code.
- DevOps & Deployment Efficiency: Streamlined the deployment lifecycle using Git and Bitwise SSH, reducing manual deployment time by 50% while maintaining 99.9% system uptime across multiple LiteSpeed server environments.

Notable Projects

Capstone Project – Hotel & Restaurant Financial Management System Sept. 11, 2025 - Nov. 20, 2025

- Built an integrated Financial Management System (AR, AP, GL, Disbursement, Reporting) for hotel/restaurant operations, with Google Maps device/location tracking and 3 AI features (win scoring + follow-ups, discount suggestions, AI prioritization).
- Cut collections triage time 30–45% , improved on-time follow-ups 20–35% , boosted throughput 15–25% (18+23 tickets/day) , and logged 100% of sessions with device/location audits.

Capstone Project-Transportation Network Vehicle Service Human Resource Nov. 23, 2025 - Dec. 20, 2025

- Built an AI-assisted Employee Information System (EIS) module within a larger HR platform. Delivered learning & training management (enrollment, schedules, assessments, dashboards) using Laravel/PHP and Blade/Alpine.js.
- Estimated 35% reduction in admin time for training score validation/reporting. Achieved by unifying week-based LMS exam results + training attendance grades into a single per-participant view with one-click schedule access.

Capstone Project – School Management Curriculum & Subject Management System Dec. 22 2025- Jan. 19, 2026

- Developed the CRAD module within a larger Educational Information System, delivering curriculum/accreditation workflows with AI-assisted validation plus an Archive + Audit Trail feature for secure record retention and restoration.
- Impact: reduced manual validation effort by ~40%, improved audit readiness by ~60%, and cut record-recovery time by ~80% through one-click restore and centralized logging.

Educational Background

Bachelor Of Science in Information Technology May 7, 2026

Bestlink College of the Philippines Certification:

- NCIII TWSP Programming Java Dec 2024
- Introduction to AI Nov 2025
- Familiarizing with AI Nov 2025
- Research Forum 2025 Nov 2025
- Introduction to IOT Dec 2025
